Uni-Pro Genius TurboSand Press Release

If you've ever had to paint a room, then you know how important preparation is, particularly when it comes to sanding that most difficult area – the ceiling!

Well, Uni-Pro has changed all that with their new “Genius TurboSand”, a patented circular pole sander that makes sanding walls & ceilings really easy and really fast!

The unique free spinning and tilting head stays flat on the surface so there's no flipping and no ripping, which means there's no reworking. You do it once and it's done.

The Genius TurboSand simply screws onto standard painting extension poles. The unique protective rubber bumper strip prevents damage to adjoining surfaces, so you can sand right up to corners and edges.

The hook covered back takes any 230mm (9”) hook and loop sanding disk, and Uni-Pro have a range of five grits (80 through 220) available to handle any situation.

The Uni-Pro “Genius TurboSand” retails for around \$69.00 and is available from Bunnings, Dulux, and all leading hardware and paint retailers.
