Safe & Effective Earth Friendly

SMART STRIP™ is a revolutionary paint remover that is safe for the user, any substrate and the environment. It is formulated without methylene chloride and is non-carcinogenic, non-toxic and non-caustic. This water-based stripper will effectively remove up to 15 coats of virtually any coating (oil-based, water-based, acrylics, varnishes, urethanes - *even old lead paints*) from any interior or exterior surface (wood, brick, stone, concrete, plaster, metal, plastic, glass, fiberglass, etc.). **SMART STRIP™** has zero VOC's, is odor free, user friendly, 100% biodegradable and pH neutral.

Easy Application and Removal

SMART STRIP™ is a water-based paste that is easily applied by brush, roller or conventional airless spray. Allow the paste to dwell on the coatings for 3-24 hours, depending upon the number of coats and type of coatings to be removed. **SMART STRIP™** is formulated to remain wet and effective over extended periods of time and does *not* require the use of **PEEL AWAY® Paper**. After appropriate dwell time, remove the paste and the softened/lifted paint using a scraper. Any remaining residue can be removed with a sponge and water or a power washer. There is no need to neutralize the stripped surface.

When Performance and Versatility Counts

SMART STRIP™ is ideal for a wide range of Do-it-Yourself, Residential, Commercial, and Industrial applications. This product simplifies paint removal and delivers top-quality performance when removing a vast range of coatings. **SMART STRIP™** provides users the **smart solution** on even the most difficult paint removal projects.

Innovative and Environmentally Safe Solutions from a Brand You Can Trust

Since 1981, **DUMOND®** has excelled in developing environmentally responsible products for the restoration industry. Today, the **PEEL AWAY®** brand is recognized as the market leader of earth friendly, high-performance paint removal products.
